The gap.

Bases ships with a table view and a card view. Nothing summarizes. Counting tasks per status by priority, summing hours per project by week, comparing entries across two dimensions — there is no built-in answer.

Basecraft fills it. One Pivot view, native to your vault.

	high	low	med
doing	3	2	1
done	1	4	2
todo	2	1	3

What you get with Pro.

1 Drill-down

Click a cell to see the matching notes. Click a name to open it.

2 Heatmap

Conditional formatting that makes outliers obvious at a glance.

3 Percentages

Show values as % of total, % of row or % of column.

4 Advanced aggregations

Average, min, max, median, distinct count.

5 CSV + Excel export

Styled XLSX preserves header, heatmap and totals.

6 Future Pro included

Multi-dim rows/cols and PNG export are next, included free.
